Can a motor open a circuit breaker remotely?The motor mechanism can open and close a circuit breaker remotely with electrical commands. There are many applications: Do not modify the wiring diagrams for the motor mechanism. Failure to follow these instructions can result in injury or equipment damage. How do I Reset my breaker?Move the selector to the Manu position. Check that the spring-charged indicator is on charged (A). If not, reset the circuit breaker. Close the circuit breaker by pressing the closing pushbutton . The contact position indicator (B) changes to I (ON). The spring-charged indicator (C) changes to discharged. How do you reset a breaker on a Manu?With selector on Manu, operate the charging handle 8 times to reset the circuit breaker in ready-to-close position. Result: The spring-charged indicator changes to charged (B) and the internal mechanism goes from the Trip position to the O (OFF) position (A). How do you open a circuit breaker?Move the selector to the Auto position. Cycle of operation: Close the circuit breaker by sending a close (ON) command. The contact position indicator (A) changes to I (ON). The spring-charged indicator (B) changes to discharged. Open the circuit breaker by sending an open (OFF) command. The contact position indicator (C) changes to O (OFF). What happens if a protection tripped a circuit breaker?The fact that a protection has tripped the circuit breaker does not remedy the cause of the fault detected on the downstream electrical equipment. To reset after a fault trip: Isolate the feed before inspecting the downstream electrical equipment. How do I Reset my circuit breaker after a trip?The spring-charged indicator (F) changes to charged. Resetting after a trip on electrical fault can only be done locally. When operating in automatic mode, return to manual operation to reset the circuit breaker. Do not close the circuit breaker again without first inspecting and, if necessary, repairing the downstream electrical equipment. 1 Breaker is installed in the connecting position, pull out rocker when indicator indicates "Connect", insert into rocker slot. 2 Shake the rocker counter clockwise to move the breaker from "Connect" position to "Test" position, indicator indicates "Test", and 3-position unlock button pop up, the rocker cannot be shaken anymore. 3 Press 3-position unlock button, keep shaking the rocker counter clockwise to position "Separate", indicator indicates "Separate", 3-position unlock button pop up. 4 Press unlock button, pull out the breaker main body.
