What are Ice Bear batteries? Ice Energy's behind-the-meter Ice Bear batteries offer utilities a proven way to permanently eliminate up to 95% of peak cooling load. At Ice Energy, we specialize in providing cutting-edge thermal energy AC solutions and products in Rocklin and throughout Northern California. How does the Ice Bear battery work? Our smart Ice Bear battery reduces peak cooling electricity by 95% for up to 8 hours a day, every day. The Ice Bear is an ingeniously simple "thermal battery" which can freeze ice during lower cost, off-hour electricity rates to provide cooling to your AC unit when peak electricity rates and demand charges are highest. Why should you use Ice Bear batteries? With rising temperatures, power grids are increasingly stressed. Air conditioning is the main driver of peak demand and the most difficult load to manage. Ice Energy's behind-the-meter Ice Bear batteries offer utilities a proven way to permanently eliminate up to 95% of peak cooling load.
