As of October , the average storage system cost in New York is \$/kWh. Given a storage system size of 13 kWh, an average storage installation in New York ranges in cost from \$16,169 to \$21,875, with the average gross price for storage in New York coming in at \$19,022. Maximize your clean energy with battery backup and storage. Get the most out of your system when you pair your solar panels with energy storage by storing the electricity your panels produce for future use. When the power goes out, your backup storage system can run your important needs like heat

New York has a considerable amount of solar potential and has consistently been in the top 10 US solar markets. The state has other policies in place to promote solar investment, including a feed-in tariff through Long Island Power Authority (LIPA) and net metering. Through its Reforming the Energy

In , New York passed the nation-leading Climate Leadership and Community Protection Act (Climate Act), which codified some of the most aggressive energy and climate goals in the country, including 1,500 MW of energy storage by and 3,000 MW by . In June , New York's Public Service

Energy storage has a pivotal role in delivering reliable and affordable power to New Yorkers as we increasingly switch to renewable energy sources and electrify our buildings and transportation systems. Integrating storage in the electric grid, especially in areas with high energy demand, will

New York is setting a new standard in clean energy, and energy storage is at the heart of its ambitious renewable energy plans. With the state working ahead toward a carbon-neutral grid, these systems are increasingly important for making renewable energy reliable, flexible, and effective. These

Solar + Storage With solar + storage, your solar panels will power your home and keep a battery system charged for times when the panels need a little extra backup. Most homes with solar + storage still stay
