Why should you buy a portable power station? Bring big backup power with you with these expert-recommended portable power stations, which can store enough power to charge electronics, appliances, and more. How long does a portable power station last? A portable power station's lifespan depends on the type of battery inside. Most new portable power stations, including all the models we recommend here, feature LiFePO₄ battery technology, which lasts far longer than older lithium-ion technology. How much more? LiFePO₄ power stations will last for more than 3,000 charge cycles, or about 10 years. What is the best portable power station for home backup? For those who need reliable power without the bulk, the Anker SOLIX C1000 delivers a surprising punch in a small package. It's easily one of the best lightweight portable power stations for home backup and is especially suited for apartments, travel trailers, or short-term outages. How many devices can a portable power station run? So long as your portable power station has the right ports and enough capacity, it can run a massive range of devices, including phones, laptops, and desktops. Higher capacity units will also let you power large home appliances and charge electric vehicles. How much does a portable power storage unit cost? This is a really big setup, so while it's not for everyone, it without a doubt represents the ultimate in portable power storage. And I remember when this was a \$5,000 investment, but right now the price has been slashed by 40%, so you can pick one up for around \$2,500. How much power does a portable power station hold? On the small end, portable power stations hold around 300 Wh (like the little EcoFlow River 3 Plus, our Best Budget pick). These little ones are generally smaller than a lunchbox and good for tasks like recharging laptops and speakers, LED lighting, and small fans.
