

## rome's 10 billion energy storage manufacturing project

The project is the largest energy storage system using hybrid second-life batteries in Italy. The technology of the storage system will integrate second-life batteries from three different automotive brands and enable the abatement of 16,000 tons of CO<sub>2</sub> over 10 years. 10 MWh energy storage system repurposes 762 end-of-life EV batteries, supporting peak power needs and decarbonization. Expected CO<sub>2</sub> reduction of 16,000 tons over the next decade--supporting Fiumicino's Net Zero by target. Europe's largest airport solar-battery integration, boosting energy Enel's Pioneer project is expected to last 10 to 15 years and has been integrated with Rome-Fiumicino airport's Solar Farm, self-consumption PV system. From ESS News Italy's largest second-life battery energy storage system was officially launched at Rome-Fiumicino airport yesterday. State-owned Mercedes-Benz Energy is helping to enhance the energy efficiency of Rome Fiumicino Airport with its battery storage solutions. The project utilizes repurposed vehicle batteries from Mercedes-Benz as stationary energy storage systems. The whole 10 MWh BESS (Battery Energy Storage System) is fully Italy, June 3, : Enel and Aeroporti di Roma (ADR) have officially launched the Pioneer project, a groundbreaking energy storage initiative designed to accelerate decarbonisation efforts at Rome's Leonardo da Vinci-Fiumicino Airport. The advanced system repurposes used EV batteries from multiple The inauguration of the largest energy storage facility using second-life batteries in Italy marks a turning point in the decarbonization of the Fiumicino airport hub. Thanks to the synergy between businesses, institutions and communities, "Made in Italy" innovation continues to lead the energy The Rome-Fiumicino Airport will decarbonize by integrating second-life batteries into an energy storage system. The Rome-Fiumicino Airport will decarbonize by integrating second-life batteries into an energy storage system. The Pioneer project (airPort sustainability second life battery storage) Rome's Fiumicino Airport Unveils Europe's Largest Developed by Italian utility Enel and airport operator Aeroporti di Roma (ADR), the 10 MWh battery energy storage system (BESS) strengthens the airport's energy autonomy and reduces carbon Enel inaugurates 10 MWh second-life battery project Enel's Pioneer project is expected to last 10 to 15 years and has been integrated with Rome-Fiumicino airport's Solar Farm, self-consumption PV system. Energy Storage for Rome-Fiumicino Airport, Italy Mercedes-Benz Energy is helping to enhance the energy efficiency of Rome Fiumicino Airport with its battery storage solutions. The project utilizes repurposed vehicle batteries from Mercedes-Benz as stationary energy Energy storage system based on EV batteries Italy's largest energy storage system based on used batteries for electric vehicles was inaugurated on Tuesday at Rome's Fiumicino airport to help it reduce carbon emissions. Fiumicino Unveils Europe's Largest EV Battery Developed in collaboration with German research institute Fraunhofer and system integrator Loccioni, Pioneer converts 762 decommissioned battery packs, sourced from Nissan, Mercedes-Benz, Pioneer energy storage system in Fiumicino, Italy The inauguration of the largest energy storage facility using second-life batteries in Italy marks a turning point in the decarbonization of the Fiumicino airport hub. Rome-Fiumicino Airport Decarbonizes Via Batteries The project is the largest energy storage system using hybrid second-

## rome's 10 billion energy storage manufacturing project

life batteries in Italy. The technology of the storage system will integrate second-life batteries from Pioneer, the largest Italian energy storage system, arrives at The heart of the project will be 762 battery packs and modules from three different car manufacturers - Nissan, Mercedes-Benz and Stellantis - which, regenerated and Rome's Fiumicino Airport launches Italy's largest The storage system accumulates renewable energy to be used even when the sun is not out, and leverages used electric vehicle batteries, giving them a second life. Italy's largest airport uses recycled EV batteries for Rome's Fiumicino Airport now uses second-life EV batteries to store solar energy and cut 16,000 tons of CO2 over ten years.

**U.S. Energy Storage Industry Commits \$100 Billion** The U.S. energy storage industry is committed to investing \$100 billion in American grid batteries, including both capital for building new battery manufacturing facilities and procurement of American-made U.S. energy storage industry commits \$100 billion The U.S. energy storage industry has made a historic commitment to invest \$100 billion into building and buying domestically produced grid batteries. Announced today by American Clean Power US energy storage sector pledges USD 100bn investment The American Clean Power Association (ACP), on behalf of the US energy storage industry, on Tuesday issued a commitment to invest USD 100 billion (EUR 88bn) into Tesla (TSLA) wins a multi-billion dollar Megapack Tesla Energy (TSLA) strikes the biggest Megapack battery energy storage deal of 15.3 GWh that will provide sustainable energy to California and Texas. DOE offers US\$1.76 billion to Hydrostor for A rendering of Hydrostor's Willow Rock Energy Storage Centre. Image: Hydrostor The US Department of Energy's (DOE) Loan Programs Office (LPO) has made a conditional commitment for a loan to EU launches EUR4 billion funding for clean energy The EU has launched a grant funding opportunity worth EUR4 billion for upstream and downstream clean energy projects, including energy storage. Two More Billion-Yuan Battery Manufacturing Projects Have Due to the promotion of policies related to capping and reducing carbon emissions, the global market for energy storage technologies is experiencing rapid growth. Grid-Scale Battery Storage Companies Make \$100B US Manufacturing A coalition of companies making and using large batteries for energy storage on the electric grid announced Tuesday a \$100 billion investment commitment to make and buy Two Battery Manufacturers Abandon Projects Two high-profile battery manufacturing projects have been canceled, reflecting the challenges two companies face in the competitive and capital-intensive clean energy sector. Freyr Battery Cancels Plans for Energy storage : biggest projects, financings, offtake deals A roundup of the biggest projects, financing and offtake deals in the energy storage sector that we have reported on this year. It's been a positive year for energy storage US energy storage industry ready to commit US\$100 billion Clean energy trade body American Clean Power Association (ACP) announced a commitment on behalf of the US energy storage industry to invest US\$100 billion in building Nissan LEAF Batteries start their second life with Pioneer at Italy's Nissan is delivering clean energy at scale through its contribution to a cutting-edge Battery Energy Storage System (BESS) for Aeroporti di Roma's (ADR) Fiumicino Airport Two Battery Manufacturers Abandon Projects Two high-profile battery
